

# Firefighter safety tips for charging your devices

- Always use the charger that came with your phone, tablet, e-cigarette or mobile device.
- If you need to buy a replacement, always choose a branded, genuine product from a supplier you can trust. There are lots of fakes out there, and it can be difficult to spot the difference.
- Avoid storing, using or charging batteries at very high or low temperatures.
- Protect batteries against being damaged – that's crushed, punctured or immersed in water.
- Don't leave items continuously on charge after the charge cycle is complete – it's best not to leave your phone plugged in overnight for example.
- Never cover chargers or charging devices – that includes using your laptop power lead in bed.
- When you travel, avoid keeping all your items containing lithium ion batteries together, especially on a plane. Check with your flight carrier for additional information or advice.
- Don't overload your sockets.

## Did you know?

**Counterfeit electrical chargers can be deadly – many fail to meet UK safety regulations leading to fires and injury. What may seem like a bargain at the market isn't worth the risk when you consider that it could cost a family member's life**
